

# HUMANE SOCIETY — of Indianapolis —

**We put something special together for you.**

We appreciate the tremendous support your organization provides, and to show our thanks we would like to offer all employees and associates within your organization an ongoing **25% discount for all vaccination, testing, and microchipping services offered by IndyHumane.**

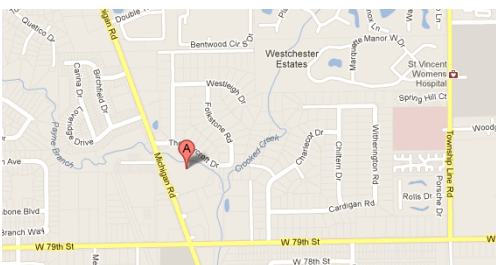

We are delighted to offer this discount at both Albert G & Sara I. Reuben Low-Cost Vaccination Clinics; each location is open four days a week and offers full vaccination packages for pets. You also have the ability to purchase various products, such as heartworm preventative and flea and tick treatments. You are welcome to bring your pet at your convenience any time during our hours; no special appointments are needed.

Each dog or cat visits with one of our vets, and will receive excellent quality but will never see an exam fee. Our low-cost clinics provide this much-needed service to our community at discounted prices and, most importantly, the money we receive through our clinics directly helps our mission and work.

Simply present your employee badge, or business card with photo identification to receive this offer.
